1. Introduction

This Test Plan describes the manual testing strategy for the OpenCart Demo Store.

The project focuses on validating the functionality of an e-commerce website through manual testing. The testing covers major customer journeys including product search, shopping cart, checkout and account navigation.

The purpose of this document is to define what will be tested, how the testing will be performed and what documentation will be produced after execution.

2. Project Overview

OpenCart is an open-source e-commerce platform that allows customers to browse products, manage shopping carts and complete purchases.

This project verifies whether the website behaves correctly during common user actions.

The testing follows a real customer journey from opening the Home Page to completing the Checkout process.

Website Under Test

<https://demo.opencart.com/en-gb?route=common/home>

Tools Used

Tool	Purpose
Browser (Chrome)	Website Testing
Excel	Test Cases
Excel	Bug Report
Excel	RTM
Microsoft Word/PDF Test Plan	
GitHub	Portfolio Hosting

3. Objectives

The main objectives of this testing are:

- Verify Home Page functionality.
- Validate website navigation.
- Test product search.
- Verify category navigation.
- Validate product pages.
- Test Add to Cart functionality.
- Verify Shopping Cart operations.
- Test Wishlist and Compare features.
- Validate Checkout flow.
- Verify My Account navigation.
- Document defects professionally.

4. Scope of Testing

In Scope

The following website modules are included.

Home Page

- Logo
- Banner
- Featured Products
- Navigation

Header

- Search Bar
- My Account
- Shopping Cart
- Checkout

Search

- Valid Search
- Partial Search
- Empty Search
- Invalid Search

Categories

- Category Navigation
- Subcategories
- Sorting
- Grid/List View

Product Page

- Product Images
- Product Information
- Quantity
- Wishlist
- Compare

Shopping Features

- Add to Cart
- Shopping Cart
- Wishlist
- Compare

Checkout

- Checkout Page
- Required Fields
- Order Summary

Footer

- Information Links
- Customer Service
- Site Map

5. Test Items

The following website areas are tested.

Module	Coverage
Home Page	Functional
Header	Functional
Search	Functional
Categories	Functional
Product Page	Functional
Add to Cart	Functional
Shopping Cart	Functional
Wishlist	Functional
Compare	Functional
Checkout	Functional
My Account	Functional
Footer	Functional

6. Features to be Tested

Each feature is verified using manual testing.

Home Page

- Page loading
- Logo navigation
- Banner display

- Featured products

Search

- Search accuracy
- No-result message
- Empty search behavior

Product Page

- Product details
- Images
- Price
- Quantity
- Buttons

Shopping Cart

- Add product
- Update quantity
- Remove product

Checkout

- Checkout page access
- Required field validation
- Order summary

My Account

- Register
- Login
- Account navigation

Footer

- Information links
- Customer Service
- Site Map

7. Features Not Tested

The following areas are outside the scope.

- Payment Gateway Testing
- Real Order Processing

- Performance Testing
- Load Testing
- Security Testing
- Database Validation
- Mobile App Testing

These areas require additional environments and specialized tools.

8. Test Approach

The testing follows a structured manual testing process.

Step 1: Website Access

- Open the OpenCart Demo website.
- Verify successful page loading.

Step 2: Functional Testing

Execute website modules in sequence.

1. Home Page
2. Header
3. Search
4. Categories
5. Product Page
6. Add to Cart
7. Shopping Cart
8. Wishlist
9. Compare
10. Checkout
11. My Account
12. Footer

Step 3: Validation

Each test verifies:

- Navigation
- Buttons
- Links
- Messages

- Product Information
- Page Loading

Step 4: Bug Documentation

When an issue is found:

- Record Bug ID.
- Capture expected behavior.
- Record actual behavior.
- Assign Severity.
- Update RTM mapping.

9. Test Environment

Item	Value
Website	OpenCart Demo Store
Browser	Google Chrome
Testing Type	Manual Functional Testing
Operating System	Windows
Internet	Required

10. Entry Criteria

Testing can begin when:

- Internet connection is available.
- Browser is installed.
- OpenCart website is accessible.
- Test Case document is prepared.

11. Exit Criteria

Testing is considered complete when:

- All planned test cases are executed.
- Critical website functions are verified.
- Bug Report is completed.
- RTM is updated.
- Test documentation is finalized.

12. Test Deliverables

Deliverable	Status
Manual Test Cases	Completed
Bug Report	Completed
RTM	Completed
Test Plan	Completed

13. Risk and Assumptions

Risks

- Website behavior may change.
- Internet issues may interrupt testing.
- Demo data may reset during testing.

Assumptions

- The OpenCart Demo website remains available.
- Test data is accessible.
- Browser functions normally.

14. Approval
